

Upgrade your Quantum Neo with X-Ray technology!

The X-Ray Field Upgrade Kit has been created to enable customers to update their Quantum Neo stations with X-ray measurement capabilities.

Advantages

- Easy integration into an existing test station+
- X-Ray shelf enables the measurement of:
 - segment length and diameter
 - aluminium overwrap
 - capsule position
 - gap between segments
- Developed with a perspective of most stick innovations including
 - complex conventional cigarettes
 - THP products
- Provides fast and sensitive measurements
- Intuitive to use
- Ideal for laboratory and factory floor QA / QC
- Complies with Ionising Radiation Regulations 2017
