

CONSULTANCY SERVICES

STANDING BY OUR CUSTOMERS TO BUILD THE FUTURE TOGETHER

CONSULTANCY SERVICES

Let Cerulean help you to meet your specific requirements through engaging with our team of experts. We offer consultancy that can customize existing equipment to suit your specific product tests, or design and delivery of brand new testing concepts, through to specification, design, management and delivery of an entire tobacco testing laboratory.

Lab consultancy can include identification of international and regional standards for desired data output; lab layout design; specification and procurement of laboratory furnishings, safety equipment, test equipment from leading suppliers; and self-contained environmental rooms to meet requirements specified temperature and humidity control. We can also help develop documentation for appropriate chemical hygiene programs.

Cerulean test equipment has been designed to meet the needs of the many, meeting testing standards for a wide range of products. We recognise that ever-changing consumer tastes demand that your products change and so new and novel testing equipment is needed. We work directly with manufacturers to develop new equipment that meet specific product needs, ensuring quality and compliance.

From R&D equipment designs for new to the world products to specialist equipment for production QA Cerulean can offer a service of design and consultancy suited to fit your business.

ENGINEERING SUPPORT

Our highly skilled engineers and technicians are ready to assist you with finding the correct solution for your ever-changing needs.

We can give advice and support on any Cerulean equipment from off-the-shelf equipment through to one-of-a-kind customized solutions.

LINE INTEGRATION

By integrating our automatic sampling range of test equipment you can expect 24 hour / 7 day a week measurements with no human intervention.

Results directly to the makers' operator allowing full confidence in your product.

CONSULTANCY SERVICES

CERULEAN EXPERTS AT HAND

VALIDATION TESTING

With ever-increasing demand for traceability, Cerulean can provide all of the services to deliver product conformance to stringent validation requirements from build through to daily-use.

Our documentation can include certificates of correct build, installation, training and maintaining of your Cerulean equipment to back-up the results measured by your equipment.

Trust your machine with our validation packages.

Many of our machines are 21CFRpart11 compliant and we can support the installation and commissioning with Good Manufacturing/Laboratory Practices documentation.

SAFETY ENGINEERING / QUALITY MANGEMENT

All of Cerulean's equipment is CE compliant and conforms to applicable European health and safety regulations.

Products come with a certificate of compliance or a certificate of incorporation depending on application.

We can perform additional safety assessments on any Cerulean equipment when requested at time of order.
