

C2 UCM WIN10 upgrade

The C2 UCM has been specifically tailored for customers wishing to upgrade their IT infrastructure to Microsoft Windows 10 compliant environments.

Advantages

- The UCM hardware is equipped with extra memory and a new solid state disk drive.
- The latest C2 application software is Windows 10 compliant and bring gains in measurement speed (20% faster measurements compared to the old UCM running version 7 software)*.
- The larger on board memory (4 GB) eliminates potential database overflow errors.
- New Intel chipset network card.
- New hardware overcomes Microsoft Windows 7 obsolescence.

* Faster measurement speeds (20% speed gain): (Win 7 - 1st rod: 1 min, subsequent rods: 25 s, Win 10 1st rod: 45s, subsequent rods: 20s).
