

Windows 10 Software Upgrade

The Quantum Neo Windows 10 Field Upgrade Kit comprises essential hardware and software components. It facilitates the seamless transition of older systems running on Windows 7 software to support the latest applications and functionalities. This includes compatibility with Cerulean Live, End Form Analyzer (EFA), X-ray, and multi-position size shelves, ensuring enhanced performance and capability.

When measuring weight, size, pressure drop and ventilation, the new application also enables up to five rods/minute which is 50% faster than the Windows 7 application.

+ Mitigate security risks with Windows 10 Operating System

+ Faster rod measurements

+ Enhanced User Interface

+ Access to the latest Cerulean software releases

Upgrade Kit Neo Software for Windows 10 OS S/C: 93535.

This upgrade was introduced to coincide with Microsoft's end of support for Windows 7. The upgrade kit consists of a replacement PC with built-in Quantum Neo application running and includes all the drivers and updates required for Windows 10 platform. It boasts a new embedded USB shelf communication hub, with much faster software.
